Dear Hiring Manager,

I am a software engineer with a Computer Science Ph.D. and 10 years of experience in industry, primarily building scalable, performant, reliable, and secure microservices to manage large amounts of data. After being affected by layoffs in Pittsburgh, I am looking for a position where I can continue doing high-quality, meaningful work with wonderful people. Please consider my resume—I think you will find a lot of overlap with your needs.

Thank you,  
Benjamin Berman
