Dear Hiring Manager,

I am a software engineer with a Computer Science Ph.D. with 10 years of industry experience, primarily building scalable, performant, reliable, and secure microservices to manage large amounts of sensitive data. After being affected by layoffs in Pittsburgh, I am looking for a position where I can continue doing high-quality work with great people. Please consider my resume—I think you will find a lot of overlap with your needs.

Thank you,
Benjamin Berman
